

SHUBHAM MOHITE

SENIOR ANGULAR DEVELOPER FRONTEND DEVELOPER SOFTWARE ENGINEER

☎ +91-9767844972 ✉ shubhammohite9081@gmail.com 🔗 linkedin.com/in/shubham-mohite 🌐 github.com/shubhammohite

Summary

Results-oriented Angular Developer with 5+ years of experience designing, developing, and maintaining enterprise-scale web applications using Angular (v14–v20), TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, and modern frontend development practices. Experienced in building high-performance Single Page Applications (SPA) using Standalone Components, Angular Signals, RxJS, NgRx, Lazy Loading, Server-Side Rendering (Angular Universal), and responsive UI design.

Strong expertise in integrating RESTful APIs, implementing secure authentication using JWT and OAuth, optimizing application performance, and developing reusable component libraries following Angular best practices. Hands-on experience working with Angular and .NET Core applications, microservices architecture, Azure DevOps, CI/CD pipelines, Git, SQL Server, Agile Scrum methodology, and enterprise software development.

Successfully delivered scalable business applications across Smart Metering, IoT, CRM, Document Management, Energy Management, and Job Portal domains, including enterprise platforms serving more than 2 million users. Passionate about clean architecture, performance optimization, problem-solving, mentoring developers, and building scalable, maintainable, and user-centric web applications.

Technical Skills

Frontend Technologies: Angular (v14–v20) , TypeScript , JavaScript (ES6+) , HTML5 , CSS3 , SCSS , Bootstrap , Angular Material , Responsive Web Design , Single Page Applications (SPA) , Progressive Web Applications (PWA)

Angular Ecosystem: Angular CLI , Standalone Components , Angular Signals , Angular Universal (SSR) , Lazy Loading , Feature Modules , Routing , Route Guards , Dependency Injection , Reactive Forms , Template-driven Forms , Custom Directives , Custom Pipes , Dynamic Components , Component Lifecycle Hooks

State Management: RxJS , NgRx Store , NgRx Effects , NgRx Selectors , BehaviorSubject , Subject , Observables , Reactive Programming

API & Authentication: RESTful APIs , HTTP Client , JWT Authentication , API Integration , JSON

Backend Technologies: C# , .NET Core , ASP.NET MVC , ASP.NET Web API , Microservices Architecture , Nodejs (Basic)

Database: SQL Server, DBMS

Cloud & DevOps: Microsoft Azure, Azure App Services, Azure DevOps, CI/CD Pipelines, Git, Bitbucket , Agile Scrum

Testing: Jasmine , Karma , Integration Testing

Development Tools: Visual Studio Code, Postman, Swagger, Jira, GitHub, Bitbucket

Architecture & Design: Component-Based Architecture, Reusable UI Components, Micro Frontend Architecture, SOLID Principles, Object-Oriented Programming (OOP), Design Patterns , Performance Optimization , Code Splitting , Lazy Loading

Experience

Austrax Technologies (Silicon Stack)

Software Engineer

Apr 2025 – Present

Pune, Maharashtra

- Developed enterprise-grade IoT monitoring applications using Angular, TypeScript, RxJS, Angular Signals, and Microservices Architecture to enable real-time monitoring, configuration, and management of connected devices.
- Designed and implemented reusable, modular, and scalable Angular components following component-based architecture, improving code maintainability, consistency, and development efficiency across multiple application modules.
- Optimized application performance by implementing Angular Signals, Lazy Loading, Code Splitting, and efficient Change Detection strategies, significantly improving UI responsiveness and reducing initial page load time.
- Integrated Angular applications with RESTful APIs and distributed microservices, ensuring secure, reliable, and high-performance communication between frontend and backend systems.
- Implemented reactive programming using RxJS Observables, Subjects, and Operators to efficiently handle asynchronous data streams, real-time updates, and complex business workflows.
- Collaborated closely with backend engineers to design scalable API contracts, troubleshoot production issues, and deliver highly available enterprise applications within Agile Scrum sprints.
- Participated in architecture discussions, code reviews, sprint planning, and technical design sessions, contributing to scalable frontend architecture and continuous improvement initiatives.

- Followed enterprise development standards including Git version control, Azure DevOps CI/CD pipelines, Jira-based sprint management, secure coding practices, and clean code principles throughout the Software Development Life Cycle (SDLC).

Tata Consultancy Services

Jul 2022 – Feb 2025

System Engineer (Angular Developer)

Pune, Maharashtra

- Developed and maintained enterprise-scale web applications using Angular, TypeScript, JavaScript (ES6+), .NET Core, and RESTful APIs, delivering secure, scalable, and high-performance business solutions for enterprise clients.
- Designed and implemented reusable Angular components, feature modules, and responsive user interfaces using Angular Material, Reactive Forms, Routing, Lazy Loading, and component-based architecture, improving maintainability and reducing development effort.
- Optimized frontend application performance by implementing Lazy Loading, code splitting, API optimization, efficient state management with RxJS, and browser caching strategies, resulting in approximately 30% faster page load time and improved user experience.
- Contributed to the development and enhancement of a nationwide Smart Meter Management Platform supporting more than 2 million users, enabling real-time device monitoring, meter exchange workflows, and operational efficiency.
- Integrated Angular applications with secure RESTful APIs and .NET Core backend services, ensuring reliable data synchronization, robust error handling, and seamless communication between frontend and backend systems.
- Implemented reactive programming using RxJS Observables and Operators to efficiently manage asynchronous data flows, complex business logic, and real-time application updates.
- Applied secure coding practices, authentication mechanisms, and input validation techniques, contributing to an estimated 20% reduction in security vulnerabilities across production applications.
- Collaborated with cross-functional teams including Business Analysts, UI/UX Designers, QA Engineers, and Backend Developers throughout the Software Development Life Cycle (SDLC) using Agile Scrum methodology.
- Participated in technical design discussions, architecture reviews, sprint planning, backlog grooming, and effort estimation, ensuring timely delivery of high-quality software releases.
- Developed comprehensive unit test cases and supported automation testing activities, contributing to 95% code coverage and improving application reliability and release quality.
- Managed source code using Git and Bitbucket while supporting Azure DevOps CI/CD pipelines for continuous integration, automated deployments, and release management across multiple environments.

Zelite Solutions Pvt. Ltd.

Apr 2021 – Jul 2022

Web Developer

Pune, Maharashtra

- Designed, developed, and maintained full-stack enterprise web applications using Angular, TypeScript, .NET Core, ASP.NET Web API, SQL Server, HTML5, CSS3, and Bootstrap, delivering scalable solutions for recruitment, education, and customer relationship management.
- Developed dynamic and reusable Angular components, Reactive Forms, custom validation, routing modules, and responsive user interfaces, improving application maintainability and enhancing the overall user experience.
- Engineered the iApply Job Portal, implementing role-based access control, secure user authentication, payment gateway integration, job application workflows, and administrative dashboards to support multiple user roles.
- Built and enhanced the Rabdan Academy VA Portal by integrating multiple enterprise systems for course management, examinations, student records, and operational workflows, improving collaboration across academic departments.
- Integrated Angular applications with RESTful APIs using Angular HTTP Client, ensuring secure data exchange, robust error handling, and seamless communication between frontend and backend services.
- Collaborated with backend developers, UI/UX designers, QA engineers, and business stakeholders to gather requirements, deliver high-quality features, and resolve production issues within Agile Scrum sprints.
- Developed and maintained SQL Server database objects, including stored procedures, views, and optimized queries, to support enterprise application functionality and improve application performance.
- Participated in code reviews, debugging sessions, technical discussions, and release activities while following Git-based version control, coding standards, and secure development practices.
- Developed SEO-friendly WordPress websites for client projects, improving website visibility, search engine ranking, and user engagement through responsive design and optimized content management.

Tecure Technology Pvt. Ltd.

Nov 2020 – Apr 2021

Java Developer

Pune, Maharashtra

- Started professional software development career by designing and developing responsive, cross-browser compatible web interfaces using HTML5, CSS3, JavaScript (ES6+), Bootstrap, and modern frontend development practices.
- Collaborated with senior developers to build scalable web applications by integrating frontend modules with Java-based RESTful APIs, ensuring reliable data communication and improved application responsiveness.
- Developed reusable UI components, implemented responsive layouts, and resolved browser compatibility issues to deliver consistent user experiences across desktop and mobile platforms.

- Assisted in implementing REST API integration, client-side validations, form handling, and dynamic content rendering using JavaScript and modern web development techniques.
- Participated in debugging, code reviews, bug fixing, and production support activities, improving application stability and overall code quality.
- Worked closely with backend developers, QA engineers, and project managers throughout the Software Development Life Cycle (SDLC), following Agile Scrum practices.
- Gained hands-on experience with version control using Git, issue tracking using Jira, and collaborative software development practices within enterprise project environments.
- Built a strong foundation in software engineering principles, object-oriented programming, clean coding standards, debugging techniques, and performance optimization, which enabled a successful transition into Angular application development.

PROJECTS

Bosch -AC-Pro Web Application(IOT) |

Angular, TypeScript, JavaScript,Angular Material,RxJS, REST APIs

2025-present

- **Angular Upgrade & Dependency Management** :- Upgraded the enterprise Angular application from Angular 9 to Angular 15, addressing framework, TypeScript, Webpack, Zone.js, and third-party library compatibility issues while maintaining existing business functionality. Adopted new Angular features and modern development practices to improve application performance, maintainability, scalability, and overall development efficiency.
- **Authentication & Session Management** :- Implemented secure authentication and session management using Access Tokens, Refresh Tokens, HttpOnly cookies, and Remember Me functionality. Developed automatic token refresh before access-token expiration, centralized 401 handling, logout/session termination, and concurrent refresh-request handling to maintain secure and uninterrupted user sessions.
- **Gateway Configuration & API Integration** :- Configured and integrated API Gateway routing between the Angular application and backend microservices. Worked on API path mappings, environment-specific gateway configurations, Angular proxy configuration, request routing, CORS, authentication headers, cookies, and withCredentials to ensure secure and reliable API communication across development, QA, staging, and production environments.
- **Account Lock Mechanism** :- Implemented configurable account-lock functionality based on consecutive failed login attempts. Developed business logic for temporary and extended account lock periods, login-attempt tracking, CAPTCHA integration, and dynamic CAPTCHA visibility based on authentication failure scenarios.
- **Production Support & Defect Resolution** :- Performed root-cause analysis and resolved functional, UI, API integration, authentication, and environment-specific issues identified during development, QA, staging, and production validation. Collaborated with backend and QA teams to verify fixes and ensure application stability.
- **Localization** :- Implemented and maintained multilingual application support by integrating translated UI labels, validation messages, status information, and user-facing content across application modules.

SwissRe - DocuSign ESignature Platform | Angular,.NetCore,MVC,Azure CI/CD

2024- Jan-2025

- **DocuSign Portal** :- DocuSign is an electronic signature and digital transaction management platform that helps businesses automate document workflows. It enables users to sign, send, and manage legally binding agreements securely over the internet.
- **eSignature Portal**:- An electronic platform that enables individuals and organizations to create, send, and manage electronic signatures. It's a secure online environment where users can sign documents, contracts, and agreements digitally, eliminating the need for physical signatures. eSignature portals often offer features such as document uploading, signature request tracking, and audit trails.
- **DRM Platform** - This dashboard provides an overview of the incident management process, focusing on incident counts, assignments, SLAs, and ticket details. It's designed to help teams monitor ongoing incidents and ensure that nothing is pending or breaching the SLA.

OSSR - Online Self Service Responsive | Angular,JavaScript,Typescript,HTML,CSS,Bootstrap

2022-24

- **OSSR- Login Enhancement Phase1A** :- Add the KPN Number in Account Details for all PPM Customers that log into OSSR.Customer will be able to see their KPN Number displayed in account details when they log into OSSR.

- **OSSR- Smart Meter Exchange** :- Smart Meters are the next generation of energy meters, replacing older analog meters which, when fully operational, will deliver benefits to customers, the environment, and the economy. The National Smart Meters program (NSMP) involves the nationwide replacement of over two million gas and electricity meters over six years. The Smart Meter upgrade will transform how energy consumption is measured, managed, and paid for.
- **OSSR – Preference Center** :- **OSSR Update Marketing Comma in Account Details Page** :- Customers with ROI Electricity Only Meter, ROI Dual Fuel Meter (Electricity and Gas), NI Electricity Only Meter, and ROI PPM Meter update preferred communication method that can be controlled How SSE Airtricity Contact. **OSSR Update Profiling Permission in Account Details Page** :- Customers with ROI Electricity Only Meter, ROI Dual Fuel Meter (Electricity and Gas), NI Electricity Only Meter, and ROI PPM Meter update whether I consent to profiling and that can be control what communications I receive from SSE Airtricity.

iApply.ai | .NetCore,RestAPI ,Angular,JavaScript,Typescript,HTML,CSS,Bootstrap, April 2021- July 2022

- * **IApply Portal:**IApply Portal manages multiple user types, including Visitors, Subscribed Users, Inactive Users, Unsubscribed Users, and Internal Users. Admin Users have full portal access to add, edit, delete, update, and approve content, as well as manage user accounts and statuses. Standard Users can add and edit draft content for further review and approval.
- * **Admin Users:** Provided full portal administration capabilities, including adding, editing, deleting, updating, and approving portal content, along with managing Standard Users and external user statuses.
- * **Standard Users:** Enabled users to create and edit draft content for subsequent review and approval by Admin Users.

AddressBeach Residences Website | Wordpress,Elementor,ThemeBuilder,PHP,Html/CSS 2021

- * Developed and maintained the company's official website using WordPress, Elementor, and Theme Builder. Customized themes, templates, layouts, and website components while implementing required modifications within the WordPress core architecture to enhance functionality and meet business requirements.

Zelite Solutions Official Website | Wordpress,Elementor,ThemeBuilder,PHP,Html/CSS 2021

- * Developed and customized the company's official website using WordPress, Elementor, and Theme Builder. Implemented responsive UI layouts, customized themes and templates, and performed modifications to the WordPress core architecture to meet business and functional requirements.

Rabdan Academy - VA Portal and Dyanamic CRM .NET Core, REST API, Angular, JavaScript, TypeScript, HTML, CSS, Bootstrap 2021

- * **Rabdan Academy:** Worked on web-based VA Portal and Dynamic CRM solutions for delivering courses and assessments to various entities, enabling organizations to register their students for different courses and assessments.
- * **Short Course System (SCS):** Managed course-related study materials, course details, and assessment information through a centralized web-based portal.
- * **CRM Integration:** Implemented CRM as the central communication and execution layer, enabling seamless data exchange and integration across multiple portals and systems.
- * **Integrated Systems:** Worked with multiple interconnected platforms, including VA Portal, CRM, ERP, Short Course System (SCS), and AD Pay, to support end-to-end course, assessment, and payment processes.

Custom Web Application (Dailymed Data search) Python , Angular, JavaScript, TypeScript, HTML, CSS, Bootstrap 2021

- * This is web-based application to scrapped data from dailymed and UsFda site(drugs information) main purpose which company used dailymed chemical and maintain data and contact to manufacture company. It will save manual efforts to track record and generate related reports for management review.

Key Achievements

- Successfully developed and delivered enterprise-scale Angular and .NET Core applications across the Energy & Utilities, IoT, CRM, Document Management, and Recruitment domains, supporting business-critical operations for multiple enterprise clients.
- Contributed to the development of a nationwide Smart Meter Management Platform serving 2M+ users, enabling real-time meter monitoring, operational workflows, and large-scale enterprise data management.

- Improved frontend application performance by up to 30% through Angular performance optimization techniques, including Lazy Loading, API optimization, reusable components, efficient change detection, and code splitting.
- Designed and implemented reusable Angular components and modular architecture, significantly improving code maintainability, development consistency, and feature delivery across multiple enterprise applications.
- Reduced application security vulnerabilities by approximately 20% by implementing secure coding practices, input validation, API security standards, and code review best practices.
- Achieved 95% code coverage by contributing to unit testing, code quality improvements, peer reviews, and continuous integration practices, resulting in more stable production releases.
- Successfully integrated Angular applications with RESTful APIs, .NET Core services, SQL Server databases, and enterprise microservices, ensuring scalable, secure, and high-performance business applications.
- Collaborated with cross-functional Agile Scrum teams including Business Analysts, Product Owners, QA Engineers, UI/UX Designers, and Backend Developers to consistently deliver high-quality software within sprint timelines.
- Mentored junior developers by conducting code reviews, sharing Angular best practices, promoting clean architecture principles, and improving overall team productivity and code quality.
- Delivered scalable web applications with a strong focus on performance optimization, responsive design, reusable component architecture, and exceptional user experience across enterprise environments.

Education

Zeal College of Engineering & Research

Bachelor of Engineering in Computer Science and Engineering – CGPA: 7.62

2017 – 2020

Pune, Maharashtra

Zeal College of Engineering & Research

Diploma in Computer Engineering – Percentage: 79.81%

2014 – 2017

Pune, Maharashtra

Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Angular Testing Master Class (Angular 16) – Udemy
- Angular NodeJS - The MEAN Stack Guide [2023 Edition] – Udemy
- Microsoft Azure Application – GreatLearning
- PwC Switzerland - Power BI Job Simulation
- Microsoft Advertising Certified Professional

Additional Strengths

- Strong problem-solving and analytical skills
- Experience with large-scale enterprise applications
- Ability to design scalable and maintainable systems
- Passion for learning modern Angular advancements
